## **DETAILED ACTION**

### ***Claim Objections***

Claims 6-24 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim, directly or indirectly. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Donnelly et al (US 6,308,639).

Donnelly et al discloses a locomotive comprised of a gas powered turbine connected to an inverter which in turn operates a generator and traction motors. A schematic of all of the components and connections is shown in figure 2. The gas turbine, inverter and motors are mounted and secured on the frame of a railroad locomotive as shown in figure 1.
